DEFEND CHAIN LUBE

TEC-GUARD DEFEND CHAIN LUBE

Tec-Guard Defend Chain Lube is a high- film strength synthetic lubricant designed to lubricate chains, escalators, moving sidewalks and elevator doors at high temperatures and high loads. Chain Lube significantly improves equipment reliability while reducing lubricant consumption by as much as 75%. Chain Lube reduces noise levels and extends the life of chains and other high wear component. Our proprietary film significantly improves lubrication: first, by increasing the oil film's thickness, and second, by increasing the oil film's toughness, both of which help to prevent metal-to-metal contact. It displaces moisture from metal surfaces and protects all metals against rust and corrosion. It also fortifies the oil against the detrimental effects of heat, which causes oil to oxidize.

PERFORMANCE ADVANTAGES

Reduces Build Up Chain Lube reduces lint build-up on chains, which wicks oil away and prevents new oil from reaching the chain. **Safe and Sanitary** Chain Oil reduces unwanted oil transfer to exposed surfaces which can create safety and sanitary concerns of oil transfer onto walk ways or onto the public. **Minimizes Odors** Chain Oil does not have the unpleasant odor that is normally associated with oils.
